

Sprint 1 Retro 05/09

What was done / What went well?:

- Everything planned was done:
 - Git set up with skeleton code
 - Dev environments set up
 - Requirements and expectations from client
 - User stories
 - Mockups and wireframes
 - Mood Board
 - Learning Javascript, React js, Node js (ongoing)
 - Database and model design
 - Confirmed client
- Good use of Google Drive and Docs

What we could have been done better?:

- Could have more specific tasks with deadlines ie more detailed
- More regular scheduled communication and updates of progress
- More proactive checking of Slack and Trello (trying to respond to messages within 24hr)

What do we want to try next to improve?

- Make tasks in Trello more specific, attaching ambitious but realistic deadlines
- At least 2 meetings a week
 - (one on Friday and one by call in the middle of the week?)
 - Monday or Tuesday afternoons for 2nd meeting on Skype
- Generally, adopt a greater sense of urgency
