Technology stack:

- Frontend: React JS -
  - This library was chosen due to the following:
    - Widespread usage, industry standard, shared learning opportunity, matching language with backend will aid with integration

- Backend: Node JS 10.16.3 LTS -
  - This library was chosen due to the following:
    - Widespread usage, industry standard, shared learning opportunity, matching language with frontend will aid with integration

- Database: Google Firebase -
  - This library was chosen due to the following:
    - Decreased learning curve and time investment as a team member has previous experience using this platform, it supports user authentication and other functional requirements

- Communication: Slack

- Task Management: Trello

- Source Control: Github
  - Protocol for pull requests:
    1. Approve
    2. Merge
    3. Delete branch

- Time format will be UNIX time
